

AJU Enterprise Development Center

How This Website Was Built — Simple Explanation

Overview

This website was built using only two things: **HTML** and **CSS**. No special software, no frameworks — just a single file you can open in any browser. Below is a plain-English breakdown of how each part works.

Step 1 — The Basic File Structure

- `<!DOCTYPE html>` — tells the browser this is an HTML file.
- `<head>` — holds the page title and all the CSS styling (the design rules).
- `<body>` — holds everything the user actually sees on the page.

```
<!DOCTYPE html>
<html>
  <head> ... styles go here ... </head>
  <body> ... content goes here ... </body>
</html>
```

Tip: Think of head as the backstage and body as the stage.

Step 2 — The Colors (CSS Variables)

- All colors were set using CSS directly on each element.
- **Blue (#003399)** was used for the header, card titles, and footer.
- **Yellow (#FFD700)** was used for the divider strip, card bottoms, and tags.
- These two colors match the AJU university brand.

```
background: #003399; /* blue */
background: #FFD700; /* yellow */
```

Step 3 — The Header

- A simple `<div>` with a blue background and white text.
- It contains a small yellow badge, a big title, and a short description.
- The word 'Enterprise Development' is wrapped in a `<span>` to make it yellow.

```
<div class='header'>
  <div class='badge'>Arthur Jarvis University</div>
  <h1>AJU <span>Enterprise Development</span> Center</h1>
```

```
</div>
```

Step 4 — The Yellow Divider

- A single `<div>` with a fixed height and yellow background.
- It acts as a visual separator between the header and the content below.

```
<div class='divider'></div>

.divider { height: 6px; background: #FFD700; }
```

Step 5 — The About Section

- A centered white box with a blue left border and yellow right border.
- It gives a brief description of what the EDC does.
- The `box-shadow` property adds a subtle drop shadow to make it stand out.

```
.about {
  border-left: 5px solid #003399;
  border-right: 5px solid #FFD700;
  box-shadow: 0 2px 8px rgba(0,0,0,0.08);
}
```

Step 6 — The Cards (What We Do)

- Each card is a `<div>` with a white background and a yellow bottom border.
- Inside each card: an image, a tag label, a title, and a short description.
- The cards sit inside a flex container so they line up in a row automatically.
- On small screens, they wrap to the next line using **`flex-wrap: wrap`**.

```
<div class='cards'>
  <div class='card'>
    <img src='...' alt='Poultry'>
    <div class='card-body'>
      <span class='card-tag'>Agriculture</span>
      <h3>Poultry Farming</h3>
      <p>Description here...</p>
    </div>
  </div>
</div>
```

Tip: Flexbox is what arranges the cards side by side automatically.

Step 7 — The Images

- All images come from **Unsplash** — a free online photo website.
- We just paste the image URL directly into the `<img src='...'>` tag.
- No downloading needed — the browser loads them from the internet.
- **object-fit: cover** makes sure the image fills the card neatly without stretching.

```
<img src='https://images.unsplash.com/photo-...' alt='Poultry'>

.card img { height: 180px; object-fit: cover; }
```

Step 8 — The Contact & Footer

- The contact strip is a blue div with centered white text and a yellow link button.
- The footer is a darker blue with the university name highlighted in yellow.
- Both are straightforward divs with text-align: center.

```
<div class='contact'>
  <h3>Interested in Our Programs?</h3>
  <a href='mailto:edc@aju.edu.ng'>Contact EDC Office</a>
</div>
```

Quick Summary Table

Part	What It Is	Purpose
Header	Blue div with text	Shows university name & EDC title
Divider	Thin yellow div	Separates header from body
About	White box with borders	Explains what the EDC is
Cards	White divs in a row	Shows each program with image
Images	Unsplash URLs	Real photos, no download needed
Contact	Blue div + yellow button	Lets visitors reach the EDC
Footer	Dark blue div	Copyright and university name
